- A flexible magnetic layer based rubberized mat [comprising] consisting of:
 - a [layer of a] flexible magnetic <u>layer</u> [composition;
- a layer of an adhesive composition on said magnetic composition]; and
- a [layer of a] rubberized [composition on said adhesive composition] layer adhesively bonded to said magnetic layer;

whereby the <u>magnetic and the rubberized</u> layers [of the magnetic composition, the adhesive composition and the rubberized composition] form a unitary flexible mat for use on metal surfaces.

- 2. The mat according to claim 1, wherein the <u>magnetic and rubberized</u> layers [of the magnetic composition, adhesive and rubberized composition] are coextensive in area.
- 3. The mat according to claim 1, wherein the rubberized [composition] <u>layer</u> is neoprene rubber.
- 4. The mat according to claim 1, wherein the rubberized [composition] <u>layer</u> is rubberized plastic.
